

EMIS

ELEVATOR MONITORING INFORMATION SYSTEM by **FUJITEC**
Monitor and control elevator operations from any number of on-site locations.

EMIS

- Oversee push notification alerts
- Control & monitor elevator operations
- Generate traffic analysis reports

ALERTS

- Possible elevator entrapment
- An in-cab elevator alarm is depressed
- Visual notification of in flight shut down

TRAFFIC ANALYSIS

Generate Wait Time reports for 3 scenarios: 24 Hour Wait Time • Per Floor Wait Time • Max Wait Time Average per Floor

RESULTS INCLUDE:

- Average Up/Down wait time
- Number of calls
- Elevators in service per hour
- Total Up/Down Hall Calls
- Percentage of wait times less than 30 and 60 seconds

FEATURES

- Assign floor buttons that are locked out on the in-car operation panel of the selected elevators (*Car Call Lockout*)
- Assign floors where hall buttons are locked out for selected elevator group (*Hall Call Lockout*)
- Assign which elevators per group will permit overriding of the Card Reader System
- Designate whether Independent Operation will override security lockouts for selected elevator groups
- Place-in or remove Freight elevator from Freight Operation
- Assign a particular elevator to VIP Operation
- Place-in or remove elevators from Independent Operation
- Place-in or release elevators from Parking Operation
- View scheduled commands by scheduling type; if necessary, delete individual scheduled commands
